

Dear FCC/NAB,

I was notified of an effort to limit and/or eliminate Traffic & Weather from XM Radio to my surprise. When this additional service was added to XM Radio I was in delight as I travel to many areas as a on site computer tech. Traffic reports sometimes before I get into an area, before I can receive on air local programming is sometimes vital to making sure I arrive to my destination on time and to avoid the traffic snarls that can occur.

I urge you to reconsider this measure to limit programming on XM Satellite radio as it has become part of my daily use for my business and sometime for personal use such as this weekend when XM is going the extra step and providing beach reports for the memorial weekend.

Thank you,

Paul D. Marchu
